A positive funny side of being transgendered.

Inter-sex and genderqueer stories are welcomed.

Most of them are true stories.

The purpose of the comic is to help others laugh at themselves and see themselves more positively because comedy can heal a person and save lives.

In contributing, you are helping everyone accept themselves and others to accept them.

How your family see's you

..How others see you

When you are female to male transgendered and not out to your parents but at school you already live in the gender that you are. this pretty much sums it up

When you have not gone through the process of name change, there is an embarrassment of why this person has this sort of name, especially when living as male with a female name.

summer = Hell for FTMs

The hot sun can be horrendous and you just cant take your shirt off because of the boobs.

How to Neuter your FTM Boy friend

a friend of mine told me his girlfriend basically took his packy or (prosthetic) penis away after they broke up. ughh thats just a nightmare to any guy right?

I can only imagine what a ftm father can go through when his daughter is going through puberty.

PARANOIA

Yes there is a paranoia of anyone noticing the breasts. you get a nice bad posture or hunch back from watching all the time wondering if anyone would notice.

yes this actually did happen. obviously she had a hard time accepting why anyone would transition to be a man because i think she saw the term within the trans community to be women only. heck i thought so too which brought up depression for me till i found out and accepted it to a point where I'm just proud of my manhood.

it was very awkward when the nurse saw this because i transitioned very well. mom of course had no issue changing in front of me because well, maybe it had something to do with her perspective of still seeing that little girl. would she have done this if this were my brother?

her friend probably still saw her as "that guy" and because i transitioned very well he didn't know that i wasn't really a cis gender so in a way he saw us looking like a gay couple. hey she's a girl and i'm a guy.

FTM Advantage...

hey there are advantages in bed with guys like us. theres more options.

lots of people during life sculpting class were too shy to even have to mold the genitalia. but yah hahah i really related to those sculptures

there are somethings that mtf women wouldn't be able to explain

yes before surgery mom did plaster cast mold my chest. it was very quite awkward for me. siigh she wanted to do something with it in her art pieces. along with have a rebirth celebration... the rebirth celebration was where i drew the line. i did not want to have to invite tons of people to do this weird crazy thing of clothes exchange . i wanted to just have it quiet and normal and not a big deal. awkward does mean uncomfortable.

The Joys of Second Puberty

i think even the ladies have to deal with zits again too. but hey i got oilier.

dad had a hard time with the transition. he and the family saw me differently than the rest of the world.

i was never really in the gay community during this time, just hanging with my straight guy buddies checking out the girls.

this is a scary type of test for a guy who has never had anything up there. plus its an awkward feeling being touched in the certain parts that don't fit ourselves because it reminds us of this situation.

i saw this girl as attractive sexy hot. mom saw her as physically cold in her surroundings. hah differences in opinion completely mismatched.

the last song a guy like me would ever want to sing. plus awkward song for the rest of the guys in the choir.
