

Tentang Kami; Palang Hitam

(automatic translation from the about page
of Anarchist Black Cross Indonesia)

WHO ARE WE?

The Indonesian Black Cross is a network for information, solidarity campaigns, medical and legal assistance for of anti-authoritarian activists who are criminalized by the authorities, which was formed in May 2018 in Indonesia. We consist of militant anarchists, students, ordinary civilians, as well as field activists.

OUR WORK

In its work, the Black Cross is non-hierarchical and decentralized, where each unit in each city is coordinated and able to carry out its work autonomously and based on individual initiatives.

Legal: Increasing confrontation of the people against the state, resulting in the criminalization and detention of anti-authoritarian activists. The Black Cross seeks legal assistance by raising funds, providing legal aid, solidarity campaigns with Indonesian and international anti-authoritarian networks, providing communication channels inside/outside prisons, providing literature and reading for detainees, psychological assistance and support for prisoners and their families, or whatever is needed.

OUR NETWORK The Indonesian Black Cross is not a formal organization with a strict hierarchy, our members join because they have various goals and purposes but are united by one goal as mentioned above. Our platform runs with the concept of decentralization and emphasizes the uniqueness of each individual in their respective regions. We don't want to be the single pioneering organization that has a monopoly on support for anti-authoritarian activists. Currently our network can be found in several areas namely, Bandung, Kendari, East Kalimantan (Borneo) and Tulungagung
